DETAILED ACTION

Election/Restrictions

1. Election of species should be required prior to a search on the merits in all applications containing both species claims and generic or Markush claims.(MPEP 808.01(a))
2. Claims 1-4 are generic to a plurality of disclosed patentably distinct species comprising:
 - (a) benzotriazole compounds encompassed by formula (I) and
 - (b) bisresorcinyltriazine compounds encompassed by formula (II);which mixture requires a burdensome classification, and/or bibliographic, manual and computer search.

Accordingly, the Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, i.e. a single compound, from each component (a) and (b) to form a composition, even though this requirement is traversed. Applicant should include a chemical structure of the elected compounds if not already contained in the specification. An election of "compounds of formula X" will be considered non-responsive. An example of the proper response would be a topical sunscreen composition comprising 2-(2'-hydroxy-5'-methylphenyl)benzotriazole as a compound (a) and 2,4-bis{[4-(2-ethylhexyloxy)-2-hydroxy]phenyl}-6-(4-methoxyphenyl)-1,3,5-triazine as a compound (b).

To be complete, a response to the election of species requirement should include a proper election along with a listing of all claims readable thereon, including any claims subsequently added. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species

to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
